

# VOSH

## INDUSTRIES

**WE MANUFACTURE  
AND EXPORT:**

**TARPAULINS**

**TENTS**

**GEOMEMBRANES**

**HDPE/PP BAGS,  
JUMBO BAGS, CEMENT  
BAGS**

**VERMIBEDS**

**DROP CLOTH**

**SHADE NETS**

## **About Us**

- 20+ years of industry experience
- All requisite testing facilities
- State-of-the-art manufacturing machinery
- Individuals with an advanced skillset
- Serving worldwide
- All required quality assurances and licenses

# TARPAULIN

We manufacture 100% Virgin Tarpaulins of different materials: HDPE, Canvas, Fire Retardant, PVC.

GSM (Grams per square metre) ranges from 80 to 900 GSM depending on your requirements. Completely customisable.

We can make Tarpaulins in any colour of your choice. The Tarpaulins can be made with dual colour too.

Tarpaulins can be made in any size or roll forms. Completely customizable.

UV Stabilizer is added to protect the Tarpaulins from excess heat.

Tarpaulins are waterproof, corrosion proof and of great tensile strength to withstand winds and rodents.

# TENTS

At Vosh Industries, we manufacture the widest range of tents for all purposes ranging from military, relief tents to luxury and recreational tents.

## Types of tents:

Military tent, wedding tents, 3 Men tents, relief tents, Mountain tents, glacier tents, extendable tents, camping tents, cottage tents, flexi tents.

Tents can be made up of multiple materials: Canvas or waterproof cloth, HDPE or plastic, Fire-Proof material, wax coated material, PVC.

Sizes and colours are completely customizable depending on your requirements and the application of tents.

Tents have different types of accessories and frames. We can provide a metal frame, bamboo frame and/or any other accessories required.

Specialized to withstand strong winds and weather conditions.

## MILITARY TENTS

## RELIEF TENTS

## RECREATIONAL TENTS

# SHADE NETS

Shade nets are made with 100% virgin HDPE fabrics and treated with UV stabilizer and have great strength capacity and durability.

Shade nets starting from 15% that is minimum light blocking intensity and going up to 95% being the maximum light blocking intensity.

## Types and GSM:

- Tape type
- Monofilament type
- Starting at 50 GSM
- Can go up to 300 GSM

**Sizes and colors are customizable. We can provide shade nets/safety nets in roll form as well.**

Applications:

- Agriculture
- Greenhouse
- Construction
- Safety nets
- Climate regulators

**GREEN NETS**

**SAFETY NETS**

**AGRO SHADE NETS**

# PLASTIC BAGS

Multi purpose plastic bags like garbage bags, Thank you bags, bio medical bags, general purpose carry bags.

They are completely customizable, in terms of size, color, length, weight capacity, and thickness and branding.

## Features:

- Can be made with recycled/ bio-degradable material. material
- UV protected
- Minimum to maximum volume capacity
- Waterproof and dust proof design.

Types: Garbage bags, carry bags, jumbo carry bags, Thank You bags, biomedical bags, biodegradable bags, mini carry bags, poly tubing bags, tshirt bags

## Applications:

- General purpose carry bags
- Waste collection bags
- Thank you bags for retail
- Waste segregation colour coded bags
- Commercial bags

## GARBAGE BAG

## THANK YOU BAGS

## BIO MEDICAL BAGS

# DROP CLOTH

Heavy Duty (high strength and durability) Canvas Drop Cloths are crafted from 'Triple AAA' grade canvas and heavy strength cotton canvas fabric

Reusable, long-lasting, and repels even the messiest paint spills while safeguarding priceless carpet and flooring.

Customizable according to particular requirements of your application and is offered in a variety of sizes and weights.

Our cotton drop sheet is constructed from the highest-grade, 100% cotton fibres, which offer the best absorption and tensile strength.

## Applications:

Furniture and Floor Cover

- Protect from paint spill
- Curtains
- Outdoor tent
- Canvas for DIY projects

**DROP CURTAIN**

**GROUND SHEET**

**PROTECTIVE CLOTH**

# GEOMEMBRANE

Mainly used for water retention including lining of lakes, ponds etc. Also used as a source to store water in huge quantities and artificial streams.

Geomembrane are made from multiple layers of 100 % virgin HDPE fabrics combined together to form a strong and impermeable sheet.

Geomembranes are synthesized to be waterproof so that they can retain water. Strong layers make Geomembranes rodent proof, wind proof and high strength

Starting at 250 microns, most common weights are: 500 microns, 750 microns, 1000 microns

## Applications:

- Aquamarine Lining-
- Oil/Gas Industrial Lining
- Tank Lining and Solar Pond Lining
- Industrial Geomembrane Lining
- Road Block Sheet
- Construction Concrete Lining
- Decorative pond lining

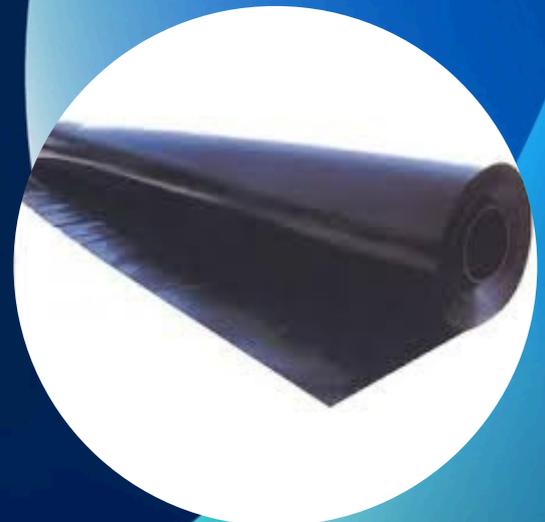

## POND LINERS

## GEO-TEXTILES

## SYNTHETIC MEMBRANE

# GROUND COVER

Ground cover, also known as Landscape fabric or weed barrier sheet is a Heavy Duty (high strength and durability) ground covers act as a barrier for your crops and plants and prevents weed from infiltrating the plant growth.

It is a multilayer sheet with an advance design which allows water and air to pass through the cover, maintaining optimal soil conditions for your plant and preventing weed growth at the same time.

Heavy duty fabric is usually preferred but can be customized from a range of 100 to 1000 gsm.

## Application/Usages:

- Small and large crop fields.
- Hardscape projects
- Landscape projects
- Garden farming
- Weed barrier
- Soil erosion barrier

## POND LINERS

## GEO-TEXTILES

## SYNTHETIC MEMBRANE

# ROOFING UNDERLAYMENT

Plastic roofing underlayment or synthetic roofing underlayment is an enforced sheet to provide an extra layer of protection as well as insulation to your roof.

It is waterproof, heavy duty and acts as a wind proof barrier. It is used to keep moisture and wind out and protect your roof from weather damage. Multiple layers of the sheet make insulation relatively better than traditional roofing underlayments.

Can be customized as per specific requirements.

## APPLICATIONS

- Ice and Water Shield
- Mildew Resistant
- Algae Resistant
- Insulation
- Windproof Barrier
- Extreme heat resistant

**POND  
LINERS**

**GEO-  
TEXTILES**

**SYNTHETIC  
MEMBRANE**

# WOVEN SACKS

Woven sacks/ bags are manufactured using state of art equipment and tested using high quality industry equipments.

They are completely customizable, in terms of size, color, length, weight capacity, and thickness.

## Features:

- Heat/wave cut & hemmed top
- Anti-slip weaving
- UV protected
- High strength and weight capacity
- Waterproof and dust proof design.

Types: HDPE Woven sacks/bags. PP woven sacks/bags, Jumbo bags, Cement bags, Fertilizer bags. Sand bags.

## Applications:

- Fertilizers/ Food grains
- Sugar bags/ Salt sacks
- Cement bags
- Heavy weight loading
- Sand and construction activities

## HDPE BAGS

## PP BAGS

## JUMBO BAGS

# PLASTIC SHEET

Plastic sheets like HDPE sheets, LDPE sheets, PP sheets used for covering of food grains, generic goods.

They are completely customizable, in terms of size, color, length, weight capacity, and thickness and branding.

## Features:

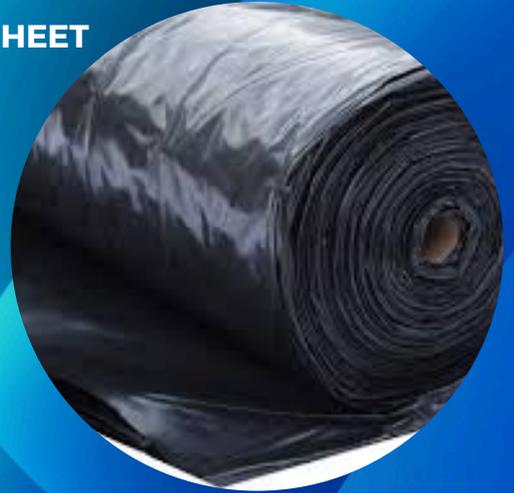

- **20 microns to 1000 microns thickness**
- **Used as a layer of protection for grains, spices and building materials.**
- **Waterproof and dust proof.**

Types: HDPE sheet, LDPE sheet, PP sheet, LLDPE sheet ranging from heavy duty to light duty.

## Applications:

- Securing and covering building materials
- Wrapping commodities
- Water proof covering for food grains, spices, sugar.

## LDPE SHEET

## HDPE SHEET

## PP SHEET

# VERMI BED

Plastic/HDPE Vermibeds are used for vermicomposting purposes using earthworms, organic waste and their nutrients.

**Dimensions:** 12 feet long, 4 feet wide and 2 feet tall  
**Shape:** Rectangular  
**GSM:** 350

Vermibeds are used for generating organic manure that has a greater quality than other inorganic and unnatural manure for agriculture.

Unlike concrete vermicomposting units, Vermibeds are movable, reusable and more efficient.

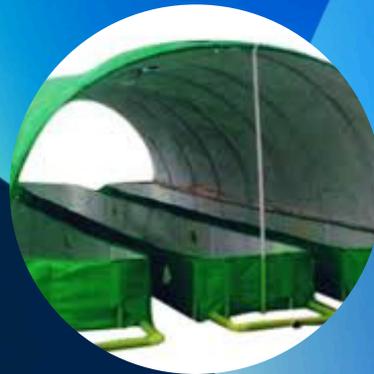

Vermibeds are completely UV Resistant, crack and tear proof, water resistant and unaffected by most agrichemicals.

Aeration net windows for air circulation maintain a greater parity of oxygen and moisture.

**VERMI  
COMPOST**

COMPOST  
MAKER BED**

**VERMICULTURE**

# REPRO GRINDING

Reprocessed grinding for HDPE/LDPE/PP is one of our prime products. Serving grinding from multiple origins.

The material is reprocessed from the finest quality of finished goods of various industries. The material is fit to be reused for preferred applications.

## Features:

- Range of MFI
- Blow moulding
- Injection moulding
- Washed/Unwashed material
- Prime quality

## Some of the products:

HDPE Drums 50-200 litres  
HDPE Gallons 10-50 litres  
HDPE Jerry cans

## Applications:

- Plastic/Polymer industry
- Coating and mixing
- Layering

HDPE

LDPE

PP

# REPRO GRANULES

Reprocessed granules for HDPE/LDPE/PP is one of our prime products. Serving granules from multiple origins.

## Features:

- Range of MFI
- Blow moulding
- Injection moulding
- Washed/Unwashed material
- Prime quality

Some of the products:  
LDPE/ LLDPE Film grade  
LDPE Granules  
HDPE drums

The material is reprocessed from the finest quality of finished goods of various industries. The material is fit to be reused for preferred applications.

## Applications:

- Plastic/Polymer industry
- Coating and mixing
- Layering

HDPE

LDPE

PP
